Introducing the
Schlage® NDE Series
wireless locks with
ENGAGE™ technology

True innovation Strong value

Welcome to ENGAGE™ technology, a new connectivity platform that makes it easy to connect people, openings and access together, delivering cost-effective intelligence and efficiency to any facility.

Schlage's NDE lock with ENGAGE technology opens the door to a new level of intelligence with optimal visibility and control. You now have the ability to see exactly who has access where and when, right at your fingertips. And, you can transition from mechanical keys to electronic credentials with technology that's easy to install, easy to manage and easy to use. With ENGAGE technology, it's more affordable than ever to use electronic locks and credentials for interior offices, common areas and sensitive spaces.

Solutions featuring ENGAGE technology can be customized to fit any size of business or budget and easily adapt to your growing or changing business needs. So whether you want the simplicity of a standalone system or the sophistication of fully integrated access control with one of our alliance partners, ENGAGE technology delivers a new level of security and convenience to the workplace.

Benefits

- Small footprint, attractive aesthetic, affordable price point
- Improved security, control and visibility of interior openings and sensitive spaces
- More efficient way to manage openings
- Protects the integrity of master key system
- Ability to update access to openings easily and quickly
- Convenience of using building ID cards beyond the perimeter

Designed to fit your needs, your work space, your work day

Schlage® NDE series wireless locks with ENGAGE technology are designed to fit into a standard cylindrical door prep, making it easy to upgrade without having to replace the door or modify the frame. Installation is complete in minutes using just a Phillips screwdriver, with no additional holes to drill or wires to run to the opening.

- Features a built-in door position sensor on the lock and strike plate, eliminating the time and cost to install and wire separate components
- Lever handing can be changed in the field in a matter of seconds
- Powered by four AA batteries with a battery life of up to two years under normal usage
- Available in a variety of finishes and lever styles to complement your décor
- Compatible with most leading key systems, which means you can leverage what you already have in place

Convenience of cloud-based web and mobile apps

ENGAGE cloud-based web and mobile apps make it simple to manage and configure NDE series locks. For basic standalone applications, the ENGAGE apps are used to manage locks, add and delete credentials and view lock history from anywhere. For applications where more advanced capabilities are required, the ENGAGE mobile app is used to configure and connect the locks to an access control alliance partner system.

Flexible solutions that fit your business needs

Basic management of locks and credentials

ENGAGE technology streamlines the ability to manage access using electronic credentials. Cloud-based mobile and web apps make it easy to manage locks and users from wherever you are, quickly changing and tracking who has access to each door.

Advanced access control capabilities

Beginning in 2015, Schlage NDE wireless locks will be able to be managed with one of our access control alliance partner systems. In these types of applications, the alliance partner's system is used to enroll credentials, define access privileges and manage schedules.

CAPABILITIES	BASIC MANAGEMENT ENGAGE technology solution (2014)	ADVANCED ACCESS CONTROL Alliance partner solution (2015) ²
